

BLUE BUCKS[®]

ADVENTURES

SPRING 2018

BLUE BUCKS® ADVENTURES

Welcome to spring, Blue Bucks® friends! The cold of winter stayed around a little longer than usual, but warmer days are here again. With the sun and the rain comes the signature of the spring season, which is growth. Everything from the tops of the trees down to the smallest blade of grass is getting a chance to grow larger, taller and more colorful.

The spring growth outdoors can always be a reminder of the importance of building up your savings in your Blue Bucks Savings Account. You may have heard someone say, “Money doesn’t grow on trees”. This is true. But the money you deposit into your Blue Bucks account can grow when the bank pays you interest. If you keep your money in the account, you’ll receive interest at other times throughout the year, making your account balance grow, just like the trees and flowers outside this spring.

The Blue Bucks gang and I thought it would be fun for you to watch something grow, so we included this cool sheet of paper that has wildflower seeds in it. All you have to do is bury the paper in your yard or in a pot, let it get sun during the day and water it every so often. If you want, you can even cut it into pieces and grow your flowers in different places!

Have fun and good luck growing your flowers - and your savings!
